## **DETAILED ACTION**

### ***Status of Claims***

Claims 1-5 and 7-10 are currently pending. Claims 6 and 11 have been withdrawn or cancelled.

### ***Allowable Subject Matter***

**Claims 1-5 and 7-10 are allowed.**

The following is an examiner's statement of reasons for allowance: as to claim 1, applicant recites a first switch for operating the clutch when the ratchet is in closed position, the first switch stopping the prime mover only when the first switch is closed, and also a second switch for starting operation of the prime mover, the second switch actuated by the arm of the release lever only when the pawl engages the detent surface.

Rogakos US4763936 is the closest prior art, and discloses a similar power door latch to the invention claimed by applicant. Rogakos also discloses switch assemblies, but fails to disclose the second switch is actuated by the arm of the release lever only when the pawl engages the detent surface. Rogakos only discloses switch elements (Figures 7a-7e) actuated by the gear members 52 and 34, and does not disclose or suggest any switches being actuated by the release levers.

Previously, Brackmann: Horst US5137311 and Baukholt US5992194 were used to modify Rogakos, to teach the claimed switch elements. However, upon further review of the cited references, and further consideration of Applicant's arguments (p. 7-9), it is apparent that it would not have been obvious to replace the contact pad/blade switches of Rogakos with the switch assemblies taught by Brackmann: Horst and Baukholt. Therefore, claim 1 is allowable

Art Unit: 3677

over the prior art of record. Claims 2-5 and 7-10 depend from claim 1 and are likewise allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
